Awards & Media: Forbes 30 Under 30 (Social Media, 2022), Atlanta Inno 25 Under 25 (2020). Featured in Forbes, Yahoo!, Sportico, Sports Business Journal, Tech Talk: 'UI/UX Design Best Practices' (Bractlet), 'Swinging for the Fences' (Clevertap)

Skills: JavaScript/TypeScript, React, React Native, Python, Java, Node.js, Next.js, Express, Expo, GraphQL, Redis, Redux, Zustand, REST APIs, Firebase, AWS, MySQL, Jest, Cypress, Stripe, Plaid, Git, HTML/CSS, Tailwind CSS, Figma, Claude Code

EXPERIENCE

Hurdlr *Accounting Software (Embedded UI & API) | Forward Deployed / Solutions Engineer*

Oct 2024 - Nov 2025

- Shipped 80+ PRs across React, TypeScript, Java, Redux, Cypress, and MySQL, improving platform stability for the V5 RESTful API serving enterprise partners.
- Refactored legacy React class components to modern functional components with hooks and TypeScript, improving code maintainability and performance.
- Implemented Redux selectors for invoice management, including bulk delete functionality with validation logic to prevent deletion of third-party payments (Stripe, Plaid).
- Wrote Cypress E2E tests to ensure platform stability, contributing to 70% test coverage across critical user flows.
- Identified and resolved 150+ tracked engineering issues (85% completion rate), performing root-cause analysis across frontend, backend, and API layers.
- Integrated and maintained third-party financial APIs including Stripe SDK and Plaid Link, collaborating with partner engineering teams on secure authentication, webhook reliability, and data synchronization.
- Established the Solutions Engineering function from scratch, serving as technical liaison for 10+ enterprise partners, leading 120+ technical syncs and streamlining integrations across UI and API.

Audia *Music Based Social Network (iOS & Android) | Full Stack Software Engineer*

Jul 2023 - Oct 2024

- Built 0-to-1: Led full-stack development of music social network from concept to App Store launch, building iOS/Android app with React Native, TypeScript, Expo and Node.js/Express backend.
- Implemented Redux for global state management, then migrated to Zustand, reducing boilerplate 40% across 20+ screens.
- Engineered real-time audio playback system with viewport-aware focus detection, managing single-instance Sound objects and automatic cleanup on navigation to prevent memory leaks.
- Designed and implemented a Node.js/Express backend handling Spotify API integration, with JWT authentication middleware, token management, and secure client-credential flows.
- Architected Firestore data model supporting posts, nested comments with @mentions, threaded replies, reposts with snapshot persistence, and user-curated collections.

DashQL with OS Labs *Open Source GraphQL Caching Solution | Full Stack Software Engineer*

Feb 2023 - Jun 2023

- Led frontend development of interactive dashboard using React, TypeScript, Chart.js, and Vite, enabling real-time visualization of GraphQL caching performance
- Built dynamic query builder UI with checkbox-driven field selection that generates GraphQL queries on the fly, supporting nested queries and 150+ query combinations.
- Implemented 4 Chart.js visualizations (line, bar, pie, result card) displaying response times, cache hit/miss rates, and field-level metrics showing up to 90% performance improvement.

Press Sports *Sports Social Network | Co-Founder & Software Engineer*

Nov 2017 - Jan 2023

- Co-founded and scaled sports social network to 350,000+ users with 4.9-star rating (11,800 reviews), leading product strategy and marketing efforts, eventually transitioning to software development.
- Directed product strategy implementing A/B tests using feature flags, analyzing results with Amplitude and Google Analytics to achieve 60% Day-1, 55% Week-1, and 25% Day-30 retention.
- Built React/TypeScript website featuring athlete profiles, homepage, and leaderboards, hosted on Firebase with Firestore.
- Optimized athlete profile pages, reducing LCP to under 2 seconds and improving Lighthouse score from 60 to 90+ through lazy loading and video pagination.
- Collaborated with designer on homepage redesign, implementing optimized video montage with CDN caching, reducing load time from ~5s to under 2s.
- Contributed to React Native mobile app development, building components and fixing bugs on a team of 7+ engineers.
- Built Python web scraping pipeline using Selenium to extract data on 10,000+ committed athletes.

EDUCATION & CERTIFICATIONS

University of Mississippi *Oxford, MS | BBA, General Business*

Aug 2014 - May 2018

Georgia Institute of Technology *Atlanta, GA | Software Engineering*

Jan 2021 - Oct 2021
